

## Classroom Quizzes and surveys

Whether students raise their hands to answer questions or use mobile devices, the use of quizzes and surveys to elicit and assess students' prior and current knowledge is common practice in our classrooms.

**PLICKERS**, a low-tech application, might provide an alternative to your current practice. **PLICKERS** allows one to create quizzes and surveys that will stimulate your students' participation and motivation from primary to higher education.

After a brief demonstration, you will be able to create quizzes on various themes and test out the digital tool.

## Programme

1. It's all about you <https://bit.ly/2ZkofAE>
2. Survey on Plickers
3. Quiz on Plickers
4. Over to you: Instructions
5. Show and share

## Plickers Classroom clickers without clicking

- Formative and summative assessment for your classroom
- Rapid-response classroom polling tool that uses paper cards rather than mobile devices for student responses.
- Combines simple tools with mobile technology.

## Instructions

### 1. Download the App

- Free download on Android or iOS
- The Plickers mobile app is required to collect student responses

### 2. Get Cards

- Print for free [https://assets.plickers.com/plickers-cards/PlickersCards\\_2up.pdf](https://assets.plickers.com/plickers-cards/PlickersCards_2up.pdf)
- Each card has a unique number – you can assign cards to students to track their responses
- Students rotate their cards to put their chosen answer on top

**3. Sign up on Plickers.com**

- Add your Classes & Students
- Plickers automatically assigns cards to students as you enter their names
- Add up to 63 students per class

**4. Create your Content**

- Create new Questions or Sets of questions in your Library on [plickers.com](https://plickers.com)
- Choose surveys, multiple choice, or true/false questions
- Include images or GIFs

**5. Scan Student Responses**

- Make sure you're logged in to the mobile app and website using the same account
- Play a Question or Set from the mobile app or from the website
- In the mobile app, tap the circle icon to open the scanner
- Plickers will instantly scan your students' cards and record their answers
- Tip: Stand back and hold your device still to capture more cards at once

**6. View Results**

- Open Reports to view your most recent results
- Use Scoresheet to monitor student progress and save time grading
- Select the date range and individual questions, or collapse sets to see total results for your students, questions, and overall class
